Innovation Stories

Württembergische Versicherung telematics app digitises insurance >

Württembergische Versicherung offers tailored car insurance policies and increases road safety via Vodafone Automotive's innovative app and telematics platform.

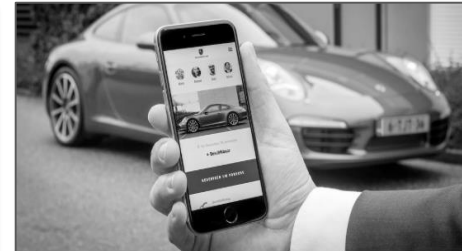

Yamaha innovates with connected TMAX >

Yamaha produces one of Europe's most popular scooters, the TMAX. Its latest TMAX model is equipped with a complete end-to-end telematics service, allowing owners to monitor riding usage, locate their bikes remotely and enable alerts.

IMA optimises roadside assistance >

IMA Italia Assistance Group is using real-time data to monitor roadside assistance across the Italian motorway network, ensuring assistance gets quickly to those who call for help.

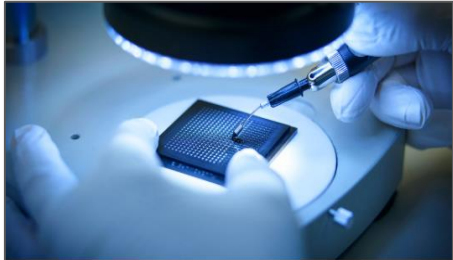

Vodafone and Porsche Netherlands offer private shared car ownership >

'Share a Porsche' service in the Netherlands enabled by Vodafone extends the experience of driving a Porsche to more people than ever before.

Innovation Stories

Smart Meter fights diabetes
in real-time >

iGlucose by Smart Meter enables patients
and healthcare teams to better manage
diabetes, with Vodafone IoT.

Sanku fights against
malnutrition >

Sanku relies on Vodafone IoT to optimise
performance of next-generation flour mills

Ekso Bionics improves
patient mobility >

The Ekso GT supports patient recovery
following stroke or spinal cord injuries. Its
creators at Ekso Bionics chose Vodafone IoT
to connect all medical devices globally,
using the same SIM for all exoskeletons.

SystemOne connects
healthcare data >

SystemOne aims to create a central nervous
system for healthcare in the developing
world. The company's solutions connect
remote clinics to central labs and the entire
supply chain, digitising the flow of
healthcare data.
